

One platform for every site operation

Ontouch helps clients manage mobile teams, site work, service checks, audits, incidents, assets, vehicles, photos and reporting - all from one connected platform.

Ontouch live dashboard

Modules that support your operation

If it is not tracked, it did not happen.

Control daily site activity from the field to the office

Ontouch gives supervisors, managers and clients a clear view of work happening across sites. Teams capture information on the app while managers review progress and evidence from the web portal.

Site Visits

Record site visits, reasons, locations and time.

Attendance

Clock staff in and out and view attendance history.

Task Management

Assign tasks to users or teams and track completion.

Security Routes

Manage routes, checkpoints and missed patrol points.

Facility Services

Track service points, questions and proof of work.

Question Sets

Build reusable checklists for audits and procedures.

Built for live operational control

See what has been completed, what is in progress and what needs attention. Ontouch replaces scattered paperwork with structured records.

Create proof clients can trust with clean audit trails

Every module is designed to create a reliable record: who did the work, where it happened, when it happened, what was captured, and what still needs attention.

Question Sets & Audits

Build reusable checklists for audits and procedures.

Incidents

Capture incidents, images, status and follow-up.

Assets

Check asset status and keep records accessible.

Inventory

Check stock, equipment and consumables.

Photos

Capture and organise site photos for reporting.

Surveys & Feedback

Collect surveys, feedback and complaints.

SOS & Safety

Give staff a safety alert workflow and audit trail.

Client Portal

Give clients access to selected reports and proof.

Optional public scan access

Selected QR/NFC points can be made public or client-facing, allowing people to scan a point and view recent service history where appropriate.

How Ontouch helps clients run better, cleaner operations

Ontouch gives management teams and clients one reliable place to see activity, proof, exceptions and trends across their sites.

1

Better visibility

Live dashboards show completed and pending work.

2

Stronger accountability

Every record links to a user, site and time.

3

Cleaner reporting

Reports by site, user, date and module.

4

Faster client proof

Quickly provide proof of service and checks.

5

Reduced admin

Less paperwork and fewer follow-up messages.

6

Scalable setup

Use one setup across sites, teams and modules.

Bring your operations together

From visits and attendance to incidents, routes, facility services and reporting - Ontouch helps manage operations with proof.
